# Protect Your Supply Chain:

## A Collaborative Approach to Risk Management

### Are You Confident in Your Vendor Management Process?

Most companies claim to prioritise supply chain security but lack the resources to ensure thorough, ongoing compliance. While suppliers may have cyber essentials, secure premises, and the right policies in place, how often are these measures truly scrutinised or verified?

Without regular checks, gaps can emerge leaving organisations vulnerable to risks ranging from cyber threats to personnel misconduct.

## Our Collaborative Solution

Three market leaders have come together to offer you comprehensive support aimed at assessing and mitigating your supply chain risks. Our tailored package includes:

B4 SECURE

Au

SLOANE RISK GROUP

### Enhanced Due Diligence

Conducting in-depth analysis and due diligence on your supply chain to identify potential security risks and vulnerabilities.

### Personnel Security Assurance

Reviewing your suppliers' screening, onboarding, and offboarding procedures, along with maintaining a comprehensive risk register.

### Site Assessments

Examining physical security protocols by conducting penetration testing at supplier locations to identify gaps and recommend actionable improvements.

### Why Choose Us?

Our commitment goes beyond a one-time review. With annual assurance checks and combined expertise, we ensure your supply chain remains resilient and compliant throughout the year.
